CHAKRADHAR PATIL

Backend Engineer | Java, Spring Boot, AWS | Microservices, CI/CD, API Security

+91-928-424-8493 • chakradharpatil.nmims@gmail.com • LinkedIn: linkedin.com/in/chakradhar-patil-281a69288 • Pune, India

PROFESSIONAL SUMMARY

Results-driven Backend Engineer with ~3 years of experience developing scalable, secure, and high-performance distributed systems for OTT platforms. Skilled in Java, Spring Boot, RESTful microservices, SQL/NoSQL databases and cloud-native development on AWS, with a proven track record of optimizing API performance, improving database efficiency, and building robust microservices. Passionate about designing fault-tolerant systems and mentoring teams in clean coding and best practices.

EXPERIENCE

Hindustan Times Labs - OTTPlay
Pune, India

Backend Developer
06/2024 - Present

- Architected and delivered 20+ RESTful APIs using Spring Boot, enhancing integration for subscriptions, payments, and coupons within OTT services
- Integrated third-party APIs for payment and subscription management, reducing transaction errors by 20% and streamlining billing processes
- Reduced API response latency by 60% through Redis caching and database query optimization
- Implemented secure AES encryption in Java to safeguard coupon redemption and integrity
- Achieved over 85% test coverage with enhanced unit and integration test suites using JUnit and Mockito, lowering regression bugs significantly
- Enabled lazy loading, reducing memory usage and page load times by 20% in high-traffic modules
- Mentored 2 interns on best practices in Spring Boot, Agile workflows, and resolving production issues

Hindustan Times Labs - OTTPlay
Pune, Maharashtra

Software Development Intern
07/2023 - 06/2024

- Assisted in developing and enhancing RESTful APIs using Spring Boot for OTT platform modules such as subscriptions and payments
- Collaborated with senior developers to integrate third-party services (payment gateways, subscription providers) and tested API workflows
- Wrote and optimized basic database queries (MongoDB/NoSQL), improving data retrieval efficiency for internal services
- Contributed to debugging and resolving production issues by analyzing logs and identifying root causes (RCA)
- Developed unit test cases using JUnit and Mockito to improve code reliability and support existing test coverage
- Participated in API testing and validation using tools like Postman, ensuring compliance with functional requirements
- Built scheduled jobs using Spring Scheduler for Zoho API to handle Zoho request, ensuring timely data sync of subscriptions & billing. Developed schedulers for subscription renewals, retries & status updates, boosting system reliability

EDUCATION

CDACINDIA
Pune, India

Post Graduation Diploma in Advance Computing | %: 73 / 100
09/2022 - 03/2023

SVKM's Narsee Monjee Institute of Management Studies (NMIMS)
Mumbai, India

B.Tech in Mechanical Engineering | CGPA: 2.77 / 4.00
06/2014 - 06/2018

TECHNICAL SKILLS

Language: Java, C/C++, SQL

Backend: Spring Boot · Rest APIs · Microservice Kafka Servlets/JSP Event-Driven Architecture

Cloud & DevOps: AWS (Codecommit, EC2, Cloud Watch) Docker GitHub Actions Jenkins

Tools: IntelliJ · Postman · Swagger UI · Git Jira ELK Stack

Security: OAuth2 · Secure API Design · JWT · Cryptography (AES) · RBAC

Testing: JUnit · Mockito · Selenium

Databases: MySQL · MongoDB (NoSQL)

Concepts: OOP · Data Structures & Algorithms · Design Patterns · Distributed Systems

PROJECTS

Safe City Labelling System

11/2022 - 03/2023

- Designed and developed a web-based application to classify and visualize safe and unsafe areas across cities, improving informed location-based decision-making
- Built a responsive front-end interface using HTML, CSS, and Bootstrap for enhanced cross-device compatibility and improved user experience
- Implemented backend services with Spring MVC, efficiently managing user requests, business logic, and data processing
- Managed relational database schemas in MySQL for city data and safety labels, optimizing queries for fast data retrieval and reduced response time
- Developed APIs and server-side components to dynamically fetch and display location-based safety data
- Prepared the system for scalability, including mobile app integration and real-time data enhancements
- Enabled users to search, view, and analyze safety information for regions, significantly reducing manual effort in identifying safe locations

LANGUAGES

Hindi Proficient ●●●●○

Marathi Proficient ●●●●○

KEY ACHIEVEMENTS

6 Event Management Lead

Led planning and execution of technical events and Robotics hackathons as Management Lead during Bachelor's at NMIMS

Team Excellence Award

Recipient of Team Excellence Award at HT Labs for impact and code quality (2025)

Achieved Grade A in the IELTS Exams

Demonstrating strong proficiency in English communication
